

NCR SelfServ™ 8

Compact Interior Payment Kiosk for Financial Institutions

Do you want to empower
your customers to do more?

YES

Offer new transactions through the most convenient channel

The NCR SelfServ 8 is a compact financial kiosk suitable for any indoor location and allows you to offer a complementary channel to tellers and ATMs. By migrating routine transactions like bill and credit card payments onto the NCR SelfServ 8, you give your customers more choice of when and where to transact. At the same time, this allows tellers to dedicate more time to customer service and focus on high-value product purchases and cross-selling.

- **Built for financial institutions**

Designed with banks and their financial customers in mind, the NCR SelfServ 8 is built on the XFS platform. This allows you to extend software from a number of channels onto the kiosk, leveraging the investment made in current channels as well as providing a familiar interface to your consumers.

- **Modern and flexible design**

The NCR SelfServ 8 offers a flexible and modular configuration to meet all your kiosk transaction needs, both now and in the future. Featuring a unique and modern design, the large 19" touchscreen will help you attract customers and increase adoption.

- **Enhanced manageability**

The NCR SelfServ 8 is designed for a 24x7 environment and uses the same proven technology and parts as our NCR SelfServ ATMs. It can be remotely managed and monitored, ensuring the highest levels of availability and operational excellence.

- **Increased revenue generation opportunities**

Benefit from the revenue generation possibilities available by offering new transactions to your customers via the NCR SelfServ 8. The cash accept capability makes it possible to offer services to your customers and to non-customers paying with cash.

- **Intrinsic security**

The NCR SelfServ 8 is both EMV and PCI-compliant with NCR APTRA™ applications and is available with NCR's full suite of security offerings.

Key Features
