I AM THE
NCR SelfServ™ 37
Weatherized freestanding full-function ATM

The only weatherized, freestanding full-function walk-up ATM on the market

Designed to easily handle the highest of transaction volumes, the SelfServ 37 keeps serving your customers with a wide range of transactions like mixed cash and check deposit and bill payment. Created to cope with the severest of weather conditions, the SelfServ 37 can be placed outdoors as a standalone unit—helping you bring your brand closer to your customers.

Proactively fixes itself

Keep your ATMs up and running, offering your customers the transactions they want, when and where they need them. NCR's express recovery and self-healing technology reduces downtime from hours to minutes—making your ATMs available around the clock.

Keeps you informed

Successful network management is about having the right information at your fingertips. NCR SelfServ ATMs provide data in real-time on configurations, software versions and the activity levels of each module. So you can see, understand and control your entire network—and make more empowered decisions.

Inspire trust in your ATM network

Our SelfServ ATMs are designed to defend against known and unknown fraud attacks, even before they start. Ask us about our multi-layered approach to ATM security including logical and physical solutions. For example Solidcore Suite for APTRA™ protects against the execution of unauthorized code on your ATM network and our Skimming Protection Solution protects cardholder data from card skimming attacks.
